

Bring us your toughest technology challenges.

Your technology is your organization's lifeblood, so you need it to be as fit, functional and aligned to your mission as possible. Myth Software makes that happen with diligent software development services, sophisticated problem-solving skills and detailed project management capabilities.

Myth Software was founded by a pair of software engineers, each with more than 20 years of experience solving business and technical issues in demanding environments. As a result, we are not only adept at aligning your solution to your methodologies, needs and regulatory requirements, but we are also intently focused on delivering your solution on time and within budget. Our passion for software engineering, proven business acumen and desire to form lasting business relationships are the added assurances you need to tame your toughest technology challenges and take your organization to the next level.

Fortify your operations with secure application development.

Myth Software leverages secure coding best practices throughout the entire development life cycle, making security the central focus of the development process. Rely on us for your most pressing needs, including:

- Full systems development life cycle and integration, including application concept, architecture framework, design, implementation, testing and documentation
- Operations and maintenance support, including installation, maintenance, enhancements and training
- Java, C++, .NET and open source software
- Agile methodologies, including RUP, Scrum and Lean
- Enterprise business applications
- Rich internet application development

Leverage cloud capabilities throughout your organization.

Our AWS-certified engineers and consultants will help you determine how to best leverage cloud computing, then customize your applications to take full advantage of the cost effectiveness, scalability, accessibility and security of the cloud. Solutions include:

- Cloud-ready enterprise application development
- Cloud architecture
- Cloud migration
- Rapid solution prototyping
- Big data analytics
- Data backup and recovery solutions
- Scalable build and test environments

Protect your mission with a holistic cyber security approach.

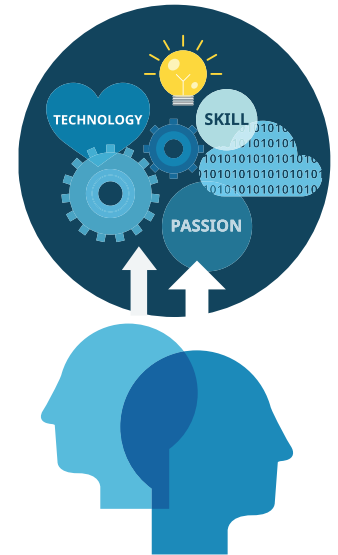

When security is a priority, Myth Software has the expertise to create reliable solutions. Myth Software leverages proven cyber security techniques to ferret out vulnerabilities in your existing applications and those in development. Services include:

- Ethical hacking
- Static/Dynamic code analysis
- Secure code reviews
- Penetration testing

Remain productive in the field with custom mobile applications.

Your people need the capability to connect and conduct business no matter where they are. Myth Software develops secure, native applications for phones, tablets and other mobile devices to help make that possible. Operating platforms include:

- iOS
- Android
- Windows Mobile
- J2ME

SBA Certified
8(a) EDWOSB

Manage your technology efficiently and effectively with DevOps capabilities.

Myth Software can manage all of your DevOps needs so you can become more agile in the face of fast-paced, fast-changing demands on your mission and infrastructure.

Services include:

- Release management
- Build management
- Continuous integration
- Virtualized build servers
- Version control
- Dependency management
- Unit tests
- Build scripts

Streamline or expand your enterprise architecture

We offer comprehensive services to make your enterprise capabilities more robust, functional and streamlined to the needs of your people and your mission. Services include:

- Systems framework and documentation support for the Federal Enterprise Architecture (FEA), DoD Architecture Framework (DoDAF), and The Open Group Architecture Framework (TOGAF) environments
- Enterprise application integration
- Service-Oriented Architecture (SOA)
- Data mining & data warehousing
- Modernization initiatives

KEY PAST PERFORMANCES	
Public Sector	
Department of Veterans Affairs	Agile Software Development and DevOps for Social Security Number Reduction Tool
U.S. Marine Corps (USMC)	Inventory Development and Management System (IDMS)
U.S. Customs and Border Protection (CBP)	Software development on a number of programs across CBP, including WHTI and ACE
Army National Guard (ARNG)	DoDAF consulting and implementation
Joint IED Defeat Organization (JIEDDO)	Custom software development for real-time RF simulation system
Office of the Under Secretary of Defense	Recovery Coordination Program – software development lead for the Case Management System
Department of State / National Geospatial-Intelligence Agency	Development of the Protected Internet Exchange
Private Sector	
KnowledgeBridge International	Android application development
